[2.0] Sesame Control (No Locks)

1
Incomplete Lock Setup Screen
This screen becomes available for a lock if it was named and registered, but the lock angle configuration (and/or the Wi-Fi setup) were not finished.

[2.0.0] No Sesame Locks Set Up

1 [2.0.1] Sesame Lock Set Up Incomplete

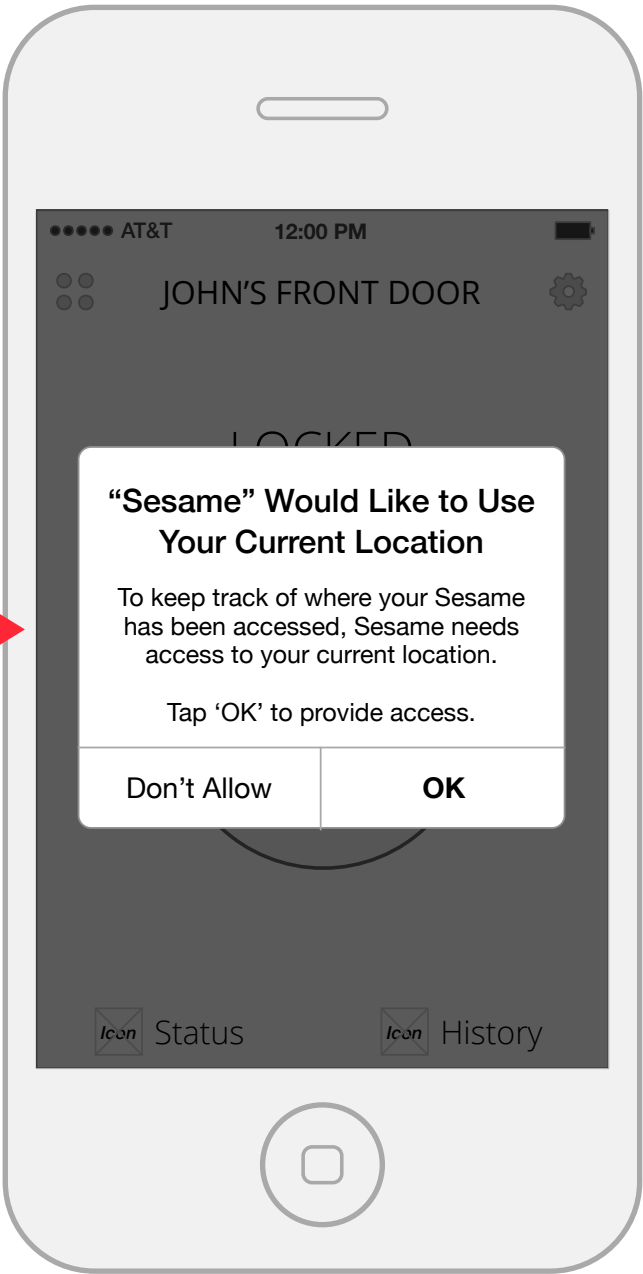

[2.1] Sesame Control (With Lock)

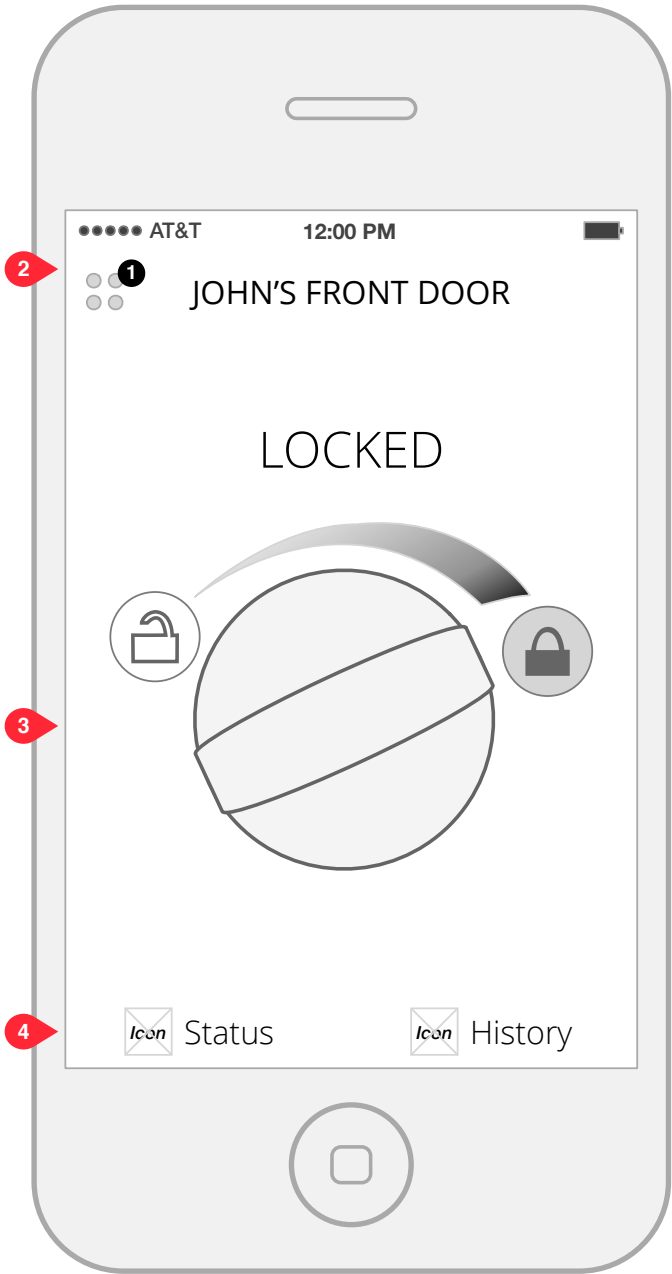

- 1
- iOS Location Access Prompt**
The first time a user has access to fully set up lock, the iOS current location prompt requests access.
- 2
- Number Badge Appears When New Locks Are Added**
A number badge appears showing the number of newly shared locks with the user.
- 3
- Software Lock Interactions and Animations**
Refer to [2.2] Sesame Control (Interactions) for details on interactions and animations of the software lock knob.
- 4
- Status/History Button Animations**
When either the ‘Status’ or ‘History’ buttons are tapped, they animate a panel upwards to go to their respective screens.
- 5
- Caution Alerts**
Caution alerts can appear on the status button if there are any concerns with the lock. Refer to [3.0] Sesame Status annotation A for conditions.

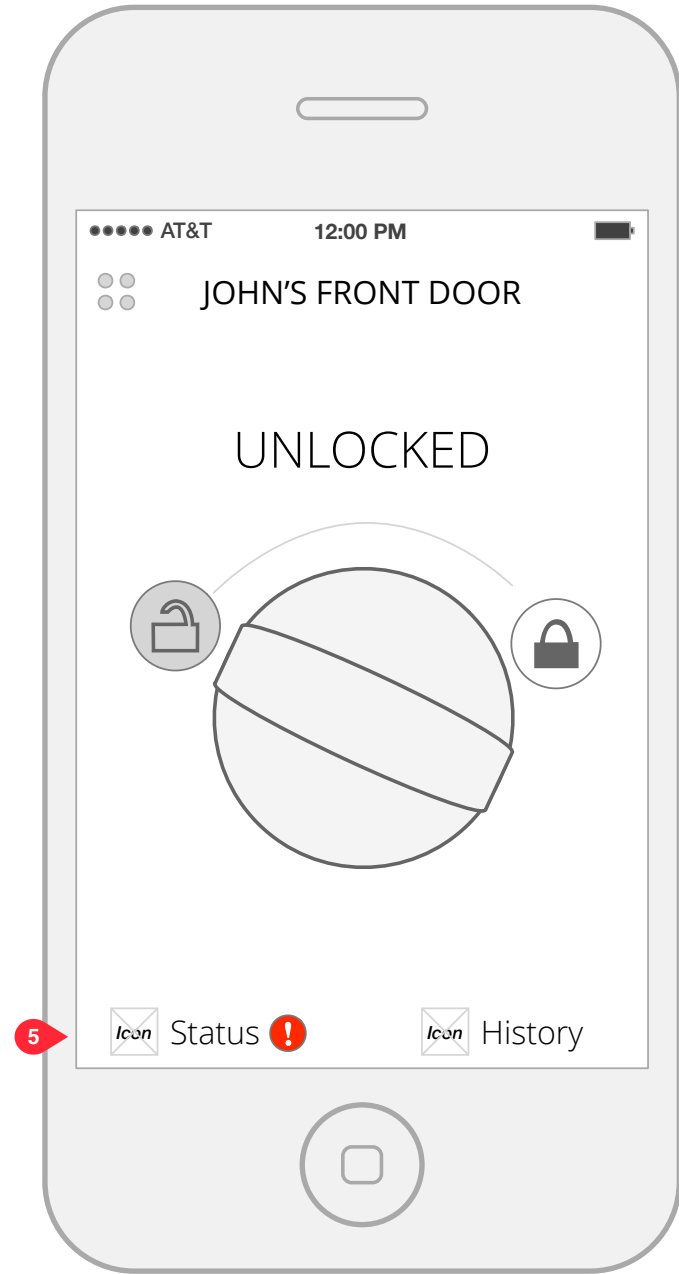

[2.1.0] Location Permission Prompt

[2.1.1] Sesame Control (Locked)

[2.1.2] Sesame Control (Unlocked)

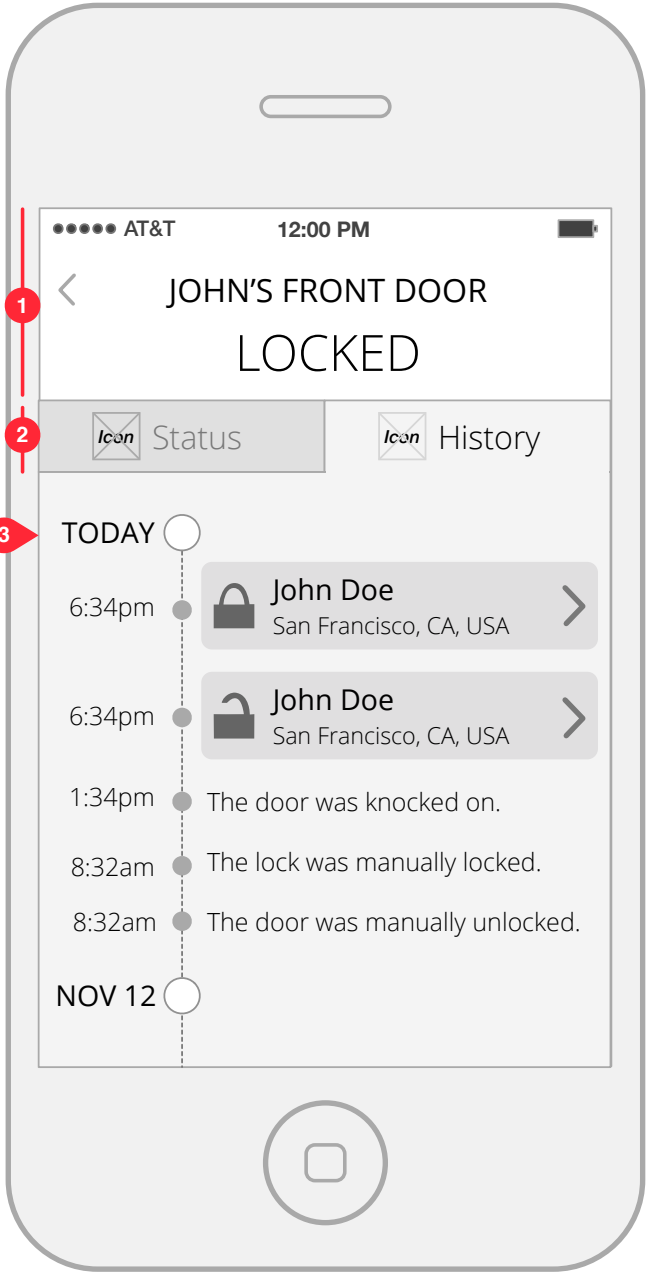

[4.0] Sesame History (Part 1)

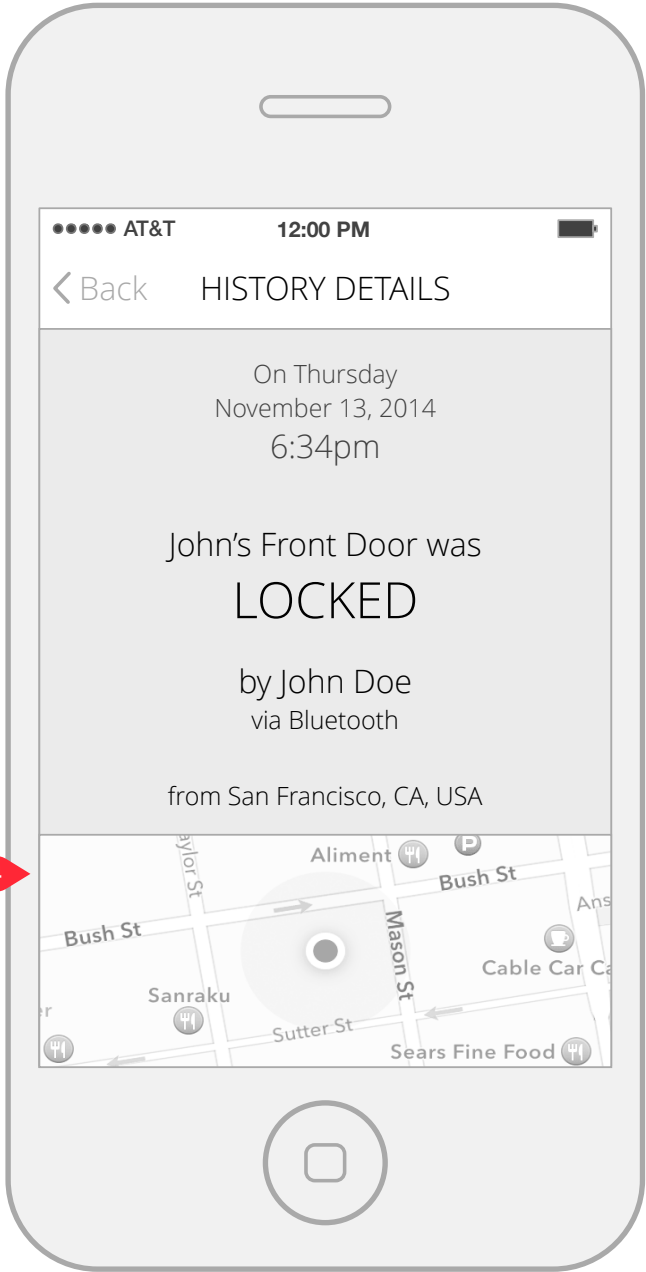

- 1
- Return to Sesame Control (Part 1)
- Users can return to the Sesame knob control by tapping in this upper area (where the lock name and locked/unlocked status are located).
- 2
- Return to Sesame Control (Part 2)
- Users can return to the Sesame knob control by tapping on ‘History’ or dragging/swiping down the ‘Status’ or ‘History’ buttons/tabs.

- 3
- Timeline of Events for Lock
- Any events associated with a registered user can be tapped to see more details.
- 4
- Mini-Map of Location of User’s Access Appears Here and Can Be Tapped to See Map Details
