

[0.1] Visual Behavior

NOTES
Outlined here are the different factors/dimensions that may impact how information is visualized.

1
Chronological Status

- a. today
- b. days and shifts in the past
- c. days and shifts in the present/future
- d. days and shifts in surrounding months

2
Interaction Status

- a. hovered day
- b. selected day

3
Restaurant Status

- a. closed days
- b. blocked days

4
Booking Status

- a. nothing booked
- b. partially booked
- c. fully booked/overbooked

September 2015													
Sunday		Monday		Tuesday		Wednesday		Thursday		Friday		Saturday

[1.0] Modal's Responsive Behavior (With Empty Day Cells @ 1024x768)

These pages outline the responsive behavior of the new date picker's modal.

1
Modal Responsive Height

Top of modal will always be right beneath the top navigation bar.

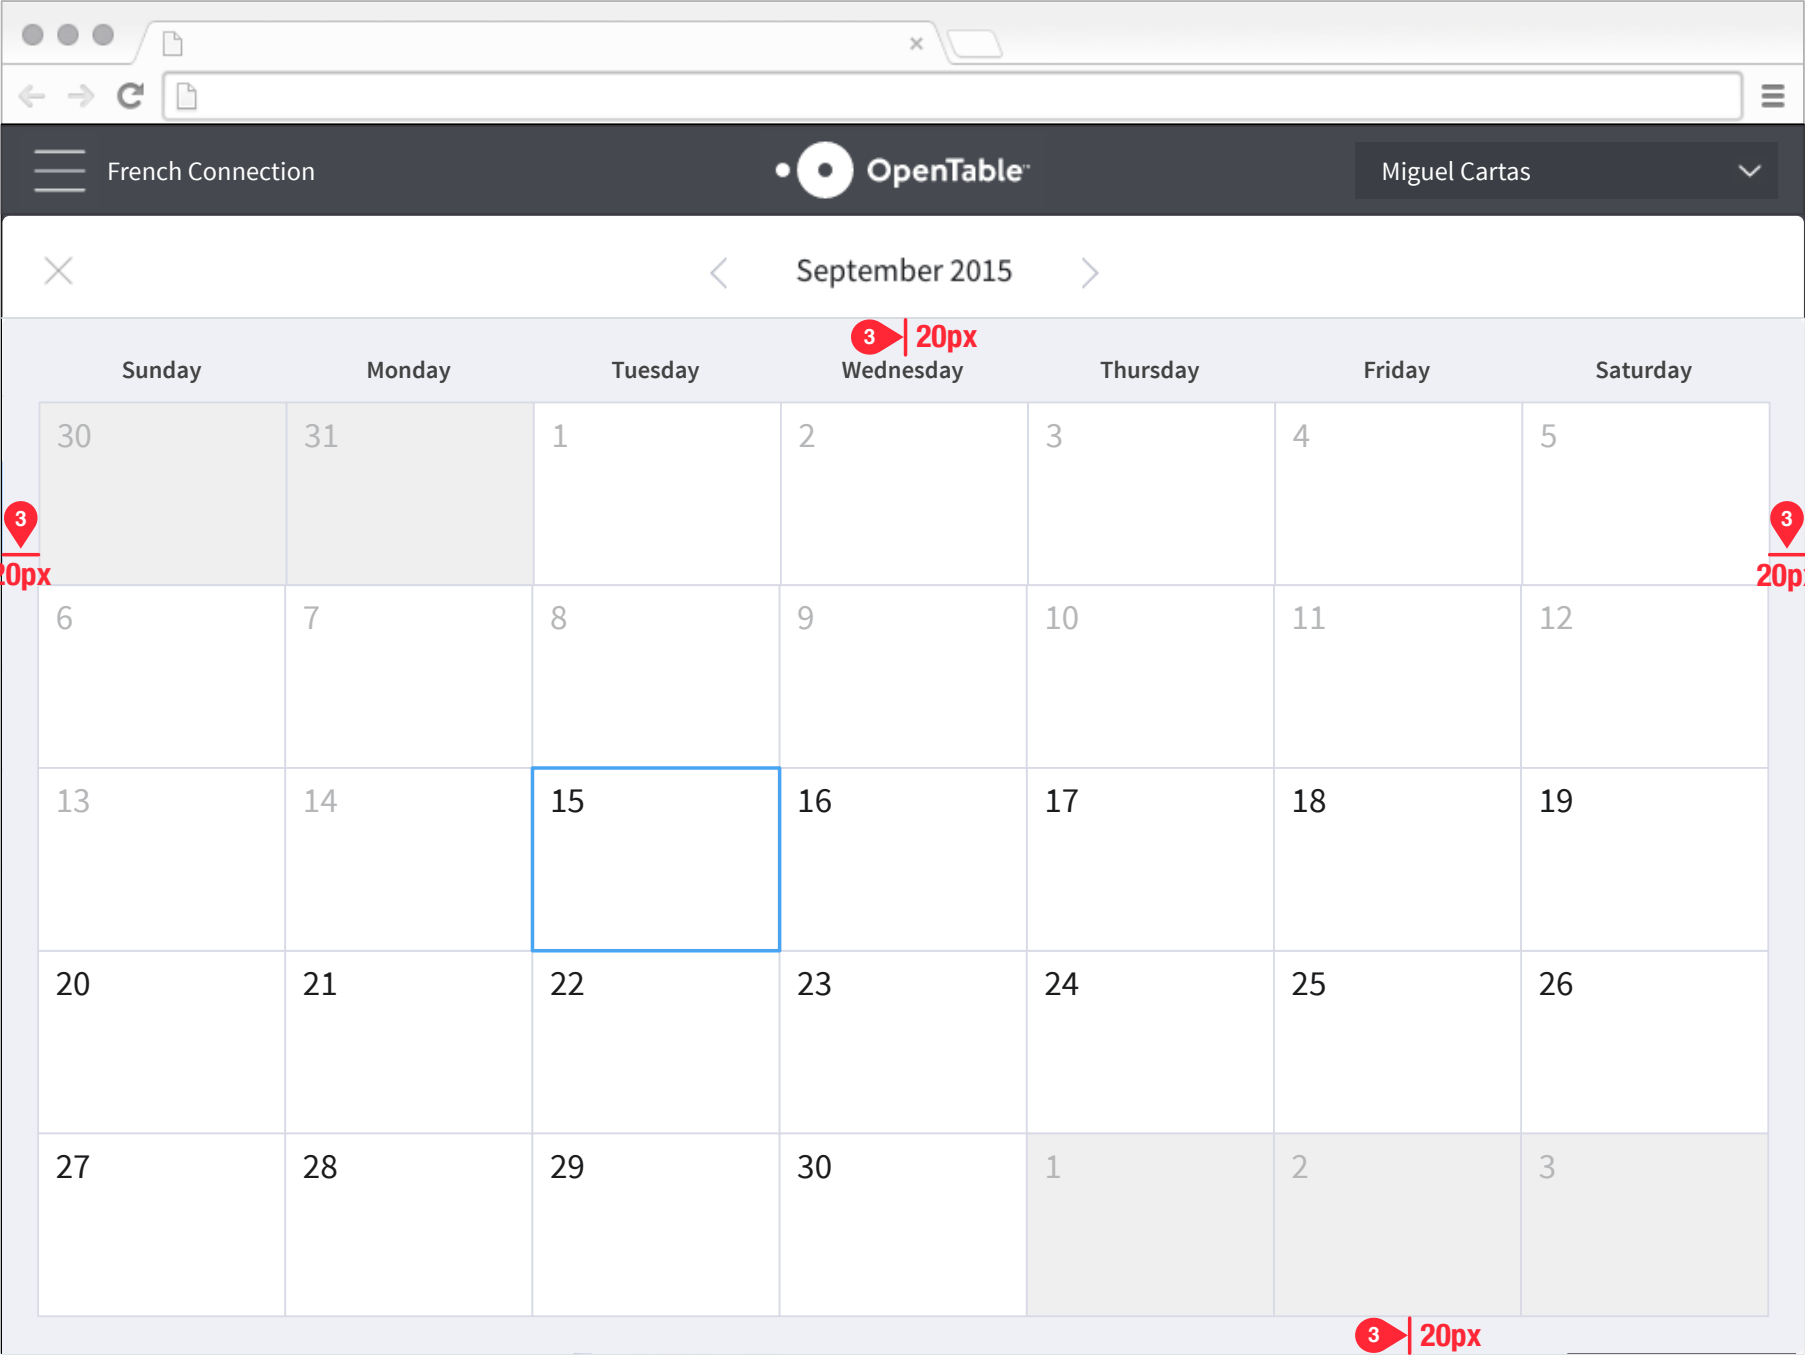

Bottom of modal will always be the bottom of browser viewport.

2
Modal Responsive Width

Width of modal will always be 100% of the browser viewport's width.

3
Modal Content Padding (20px)

Padding on inside of modal will always be 20px.

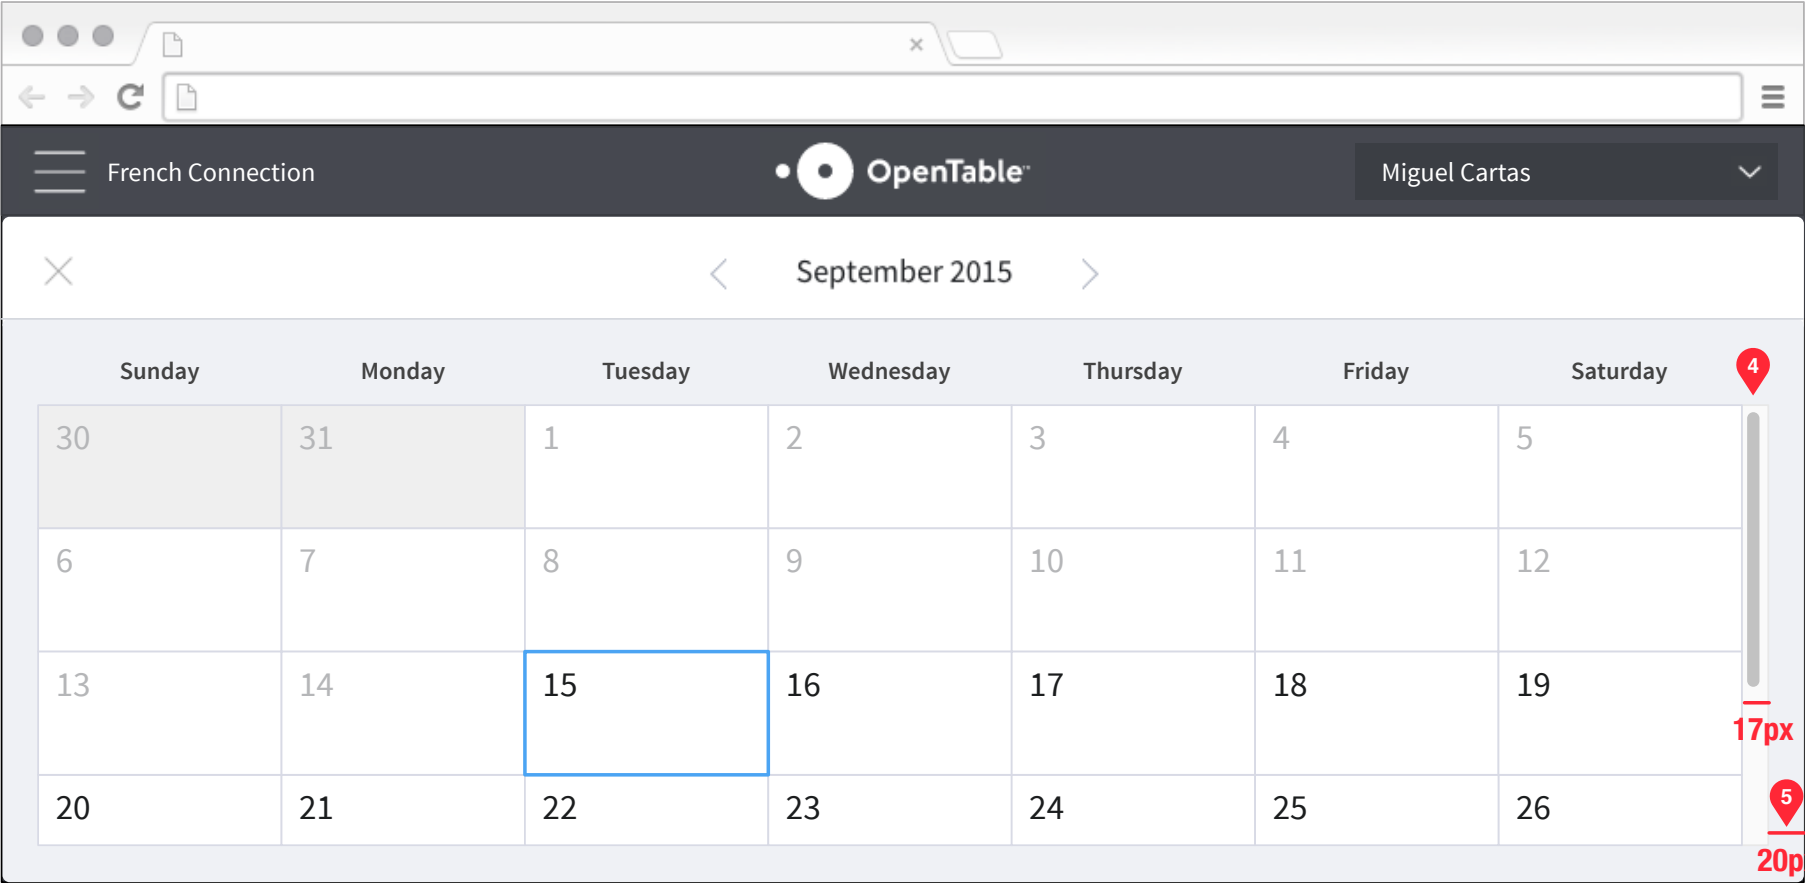

From Beneath Top Nav Bar
to Bottom of Browser Viewport

100% Viewport Width

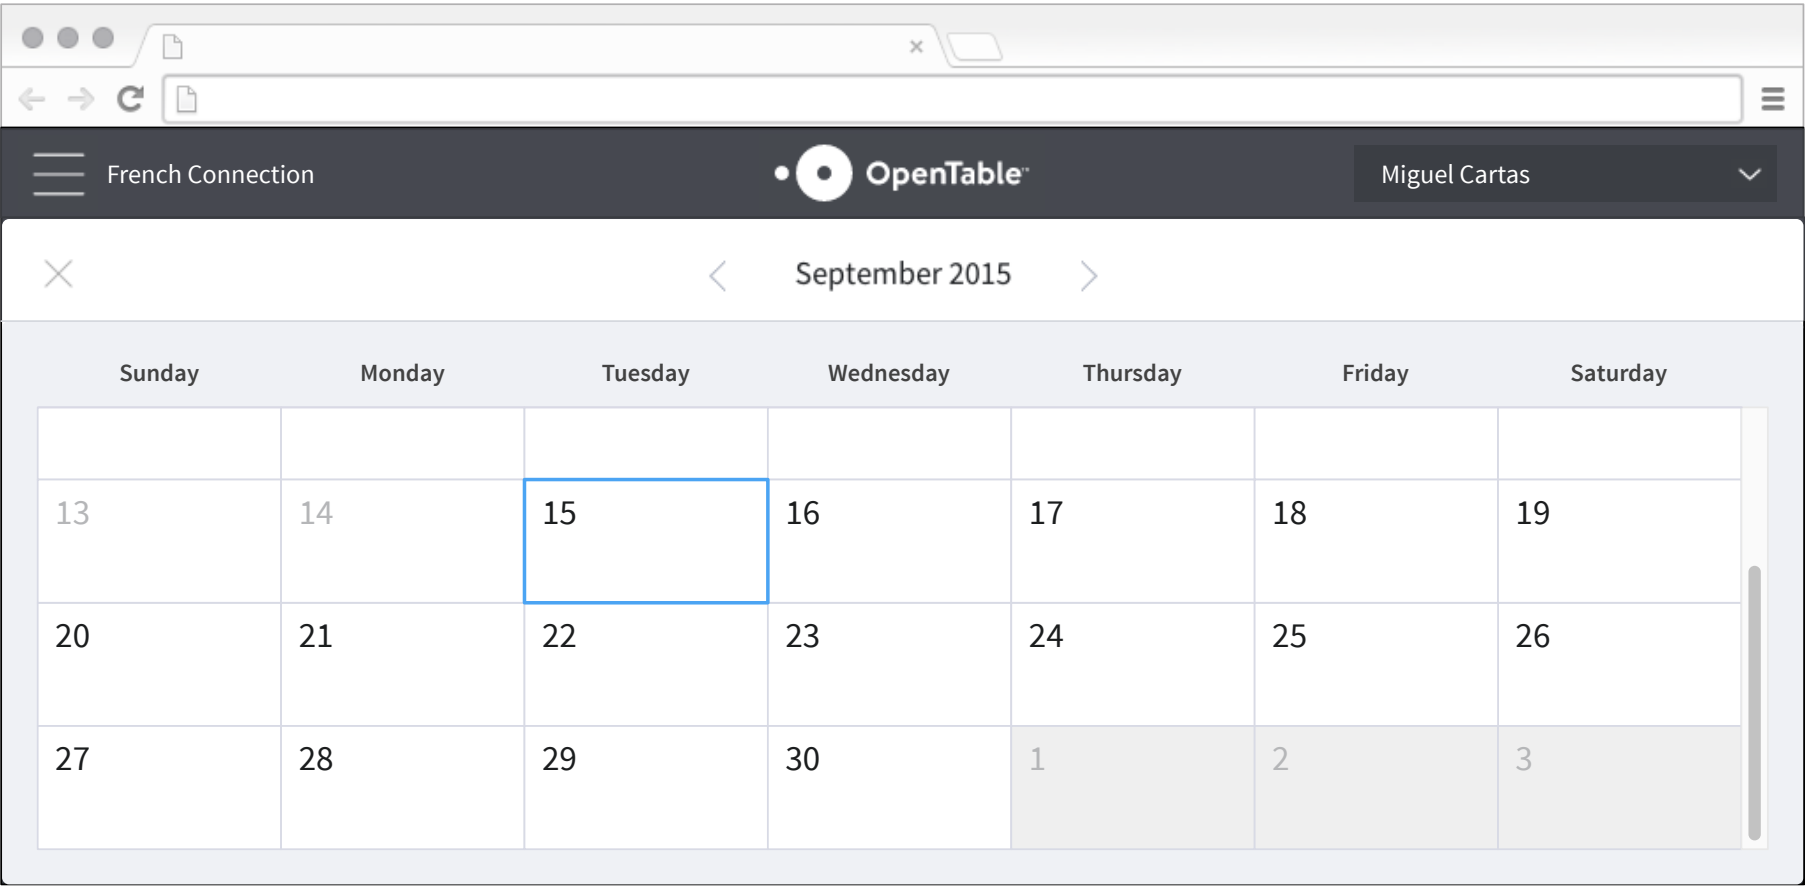

[1.1] Modal's Responsive Behavior (With Empty Day Cells @ 1024x500)

4
Vertical Scroll Bar (If Calendar Goes Beyond Bottom Margin)
If calendar contents or day cell min-heights go beyond bottom margin, the calendar becomes scrollable.

5
Scroll Bar (17px) Shrinks Day Widths
The scrollbar (17px) shrinks the width of the days on the calendar to fit and maintain a 20px padding on the right.

6
Top of Modal and Days of the Week Fixed As The Calendar Is Scrolled

[2.0] Day Cell and Modal Absolute Minimum Heights/Widths

1

**Day Cell Absolute Minimum Height
(70px)**

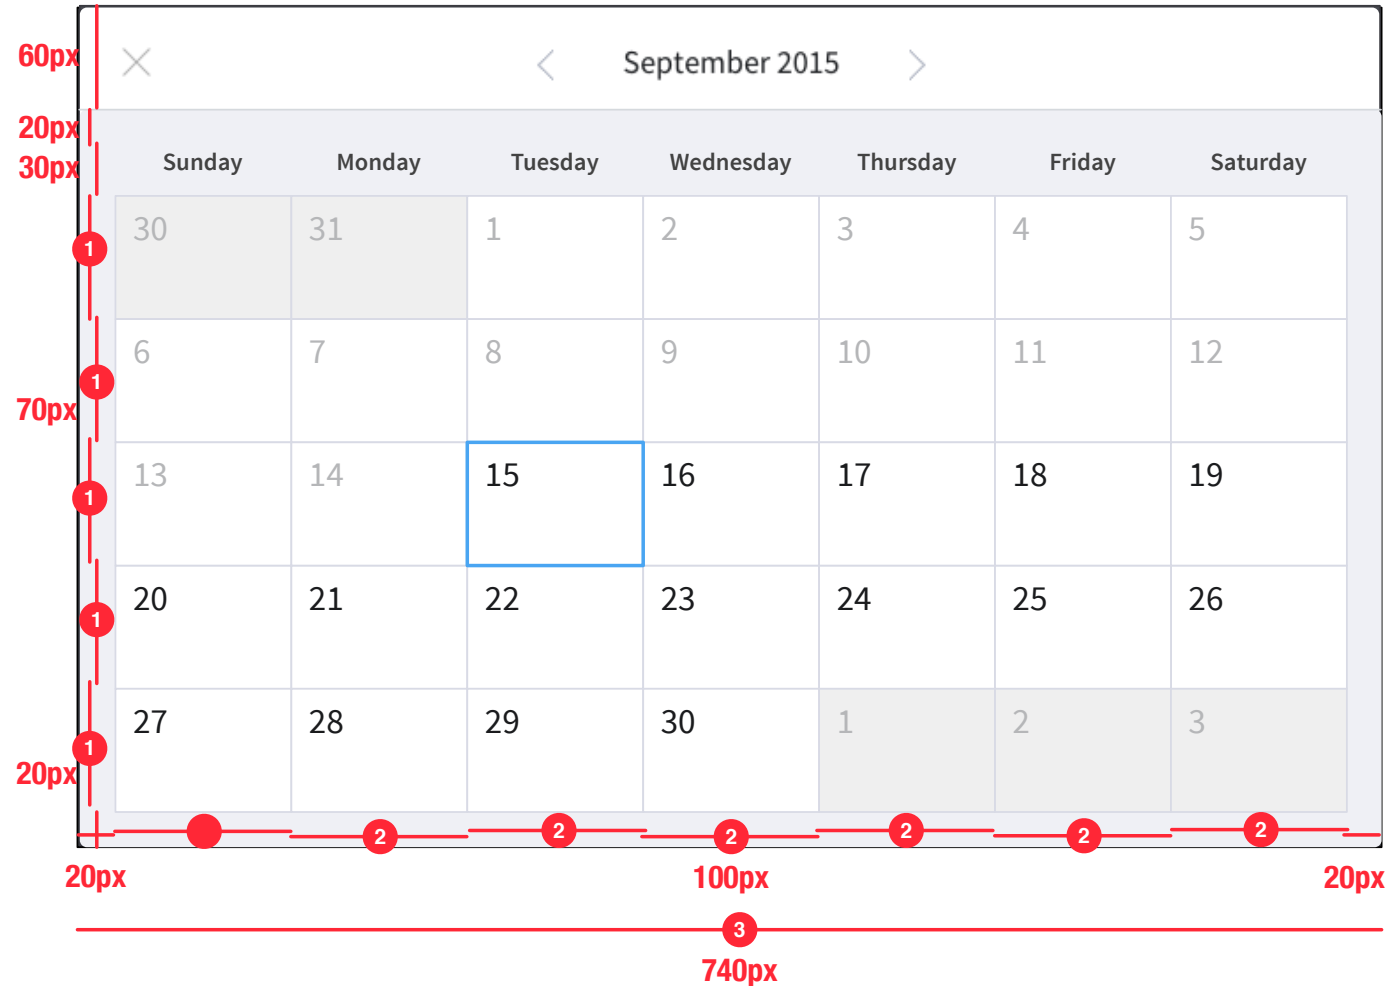

2

**Day Cell Absolute Minimum Width
(97/100px)**

The intended minimum width is 100px. However, if the vertical scrollbar appears, the width of the days should be reduced, so the real minimum width in this case should be 97px.

3

**Modal Absolute Minimum Width
(740px)**

1 Calendar with Scrollbar

A calendar interface for September 2015. The header shows the month and year with navigation arrows. The days of the week are listed as columns. The dates are arranged in a grid. The date 15 is highlighted with a blue border. A vertical scrollbar is on the right side of the calendar grid.

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
30	31	1	2	3	4	5
6	7	8	9	10	11	12
13	14	15	16	17	18	19
20	21	22	23	24	25	26

Diagram illustrating the total width of the header section, which is 740px. The header is composed of several elements with the following widths: 20px, 97.57px, 97.57px, 97.57px, 97.57px, 97.57px, 97.57px, 97.57px, 17px, and 20px.

[3.0] Day Cell Responsive Widths/Heights and Its Impact On Week Heights

1Day Cell and Week’s Absolute Minimum Width/Height

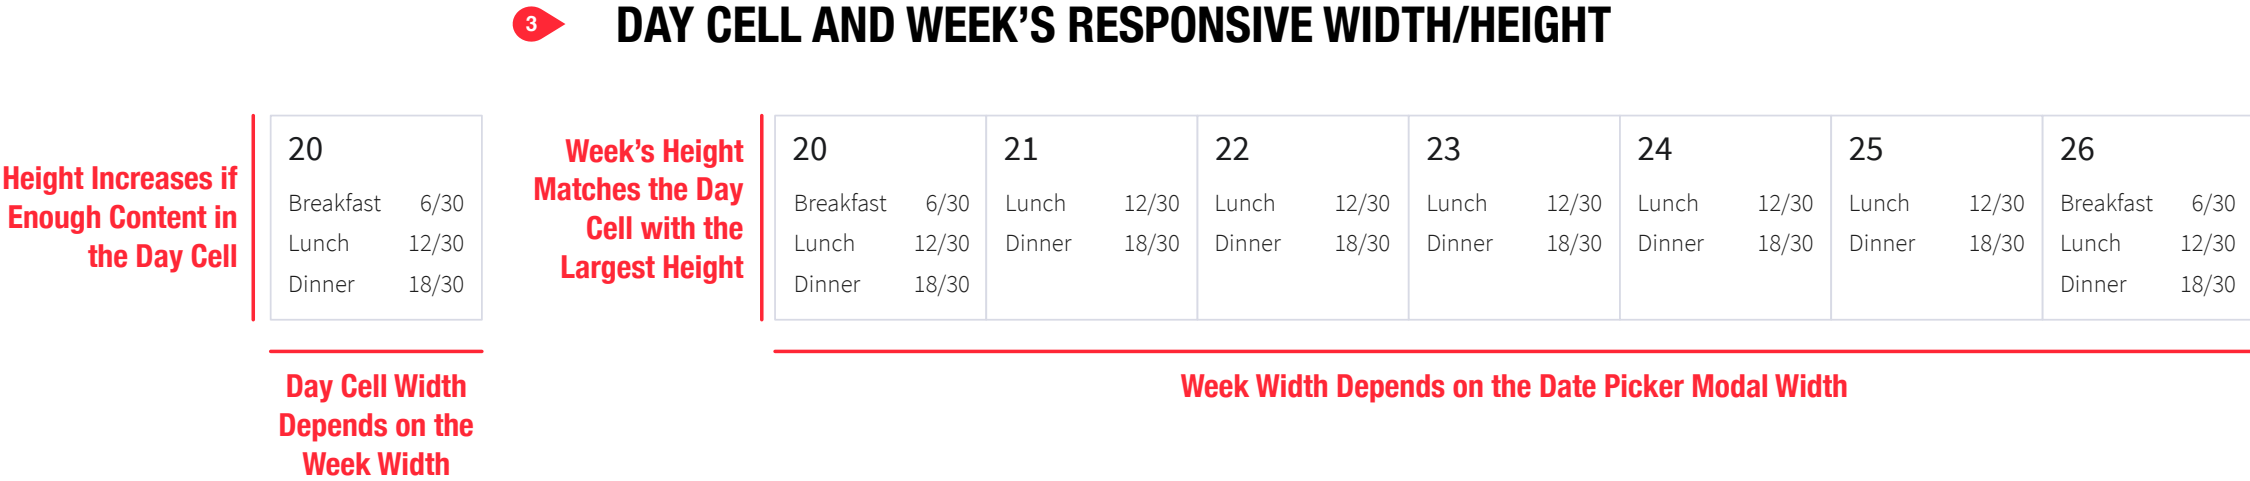

2Day Cell and Week’s Responsive Minimum Height

The minimum height of a day cell can increase based on the total height of the date picker.

3Day Cell and Week’s Responsive Width/Height

The day cell height can expand beyond its minimum height based on a day cell's content.

4Day Cell’s Responsive Content Truncation

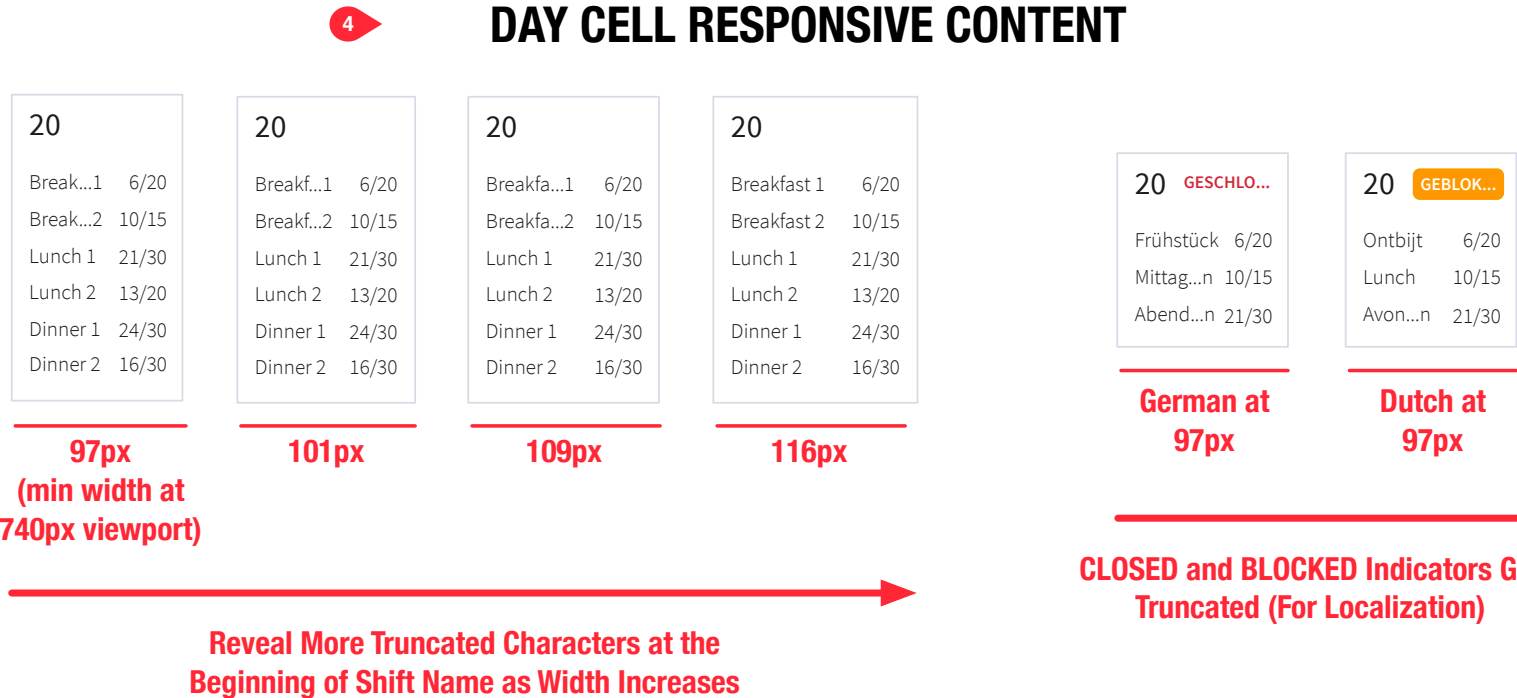

Shift names are left-aligned. Cover ratios are right-aligned.

Shift names become truncated when the width is too narrow. The truncation should always show:

- At least the first character
- The last character

“CLOSED” and “BLOCKED” indicators also get truncated as needed for localization purposes.

For truncation, use three periods (...), not the ellipses character (...). The ellipses character takes up more width in Source Sans Pro.

[3.1] Day Cell Responsive Breakpoints

1
Day Cell Initial Breakpoint
At 1024px, font sizes increase:
• Date number: 18px to 20px
• Shift names/cover ratios: 12px to 14px
• Blocked/closed indicator: 10px to 12px

20	BLOCKED
Breakfast 1	6/20
Breakfast 2	10/15
Lunch 1	21/30
Lunch 2	13/20
Dinner 1	24/30
Dinner 2	16/30

140px
(estimated width at 1023px viewport)

BREAKPOINT CHANGE
AT 1024px

+2px to date number font size
+2px to blocked/closed indicator
+2px to shift name and cover ratio font size

20	BLOCKED

Breakfast 2	10/15
Lunch 1	21/30
Lunch 2	13/20
Dinner 1	24/30
Dinner 2	16/30

140px
(estimated width at 1024px viewport)

2
Day Cell Additional Breakpoints
Starting from 1300px, for every 210px increase in viewport size (and thus, 30px increase per day cell), the font size increases.

The cover ratios also have spaces added on both sides of the forward slash to improve readability.

The breakpoints are 1300px, 1510px, 1720px, 1930px, 2140px, and 2350px.

(These breakpoints are intentionally *content-based*, not *device-based*.)
